Project 2.

25 Variations

Phase 2

Instructions

Now that you've made your 25 Variations, please create a navigation system for them. Your navigation system should be both a landing page and some sort of consistent device on each page. (Optionally, you can also have some sort of "cover page" for each Level, describing the constraints and what was allowed in each Level.)

The landing page should...

- Contain links to all 25 variations

The consistent page device should...

- Contain next and previous links to the next and previous variation
- Be relatively subtle; not interfere with the visual priority of the poem
- Be relatively the same on each page
- Possibly visually relate or resonate with your landing page
- Contain random link to a chance variation (optional)

The optional cover page for each Level could do any or all of these...

- State the Level
- Describe its constraints
- Provide visual intermission or rest

Somewhere within all of these pages you should have...

- Poem credit (author, date)
- Poem title
